

## Project Development Phase Model Performance Test

Date	18 November 2022
Team ID	PNT2022TMID53213
Project Name	Visualizing and Predicting Heart Diseases with an Interactive Dashboard
Maximum Marks	10 Marks

### Model Performance Testing:

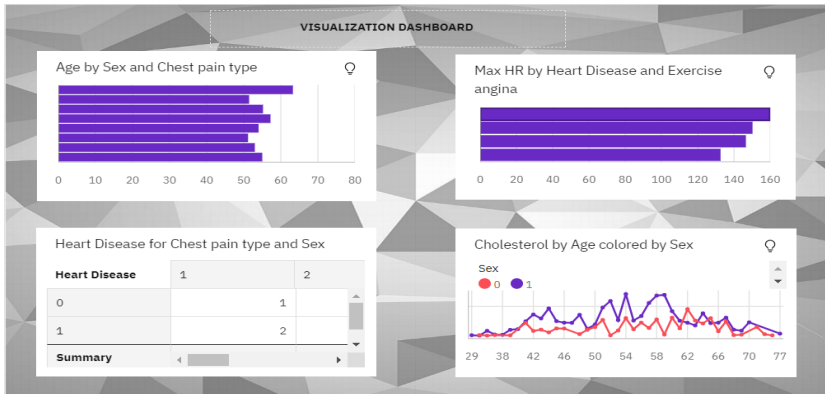

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Dashboard designs	<p>No of Visualizations / Graphs – 5 dashboard tabs with 6 visualizations in each dashboard</p> 
2.	Data Response	<p>It hides certain aspects of the visualization if the size is limited, to maximize the space that is available to display data.</p> <ul style="list-style-type: none"> <li>• Its Create with relationship with another explorations</li> <li>• There was another data exploration with various continuous values ,those values was grouped as common.</li> </ul>
3.	Dataset collection and Modification	<p>As per project ideation the dataset are collected from smartwatches by the and work the dataset through cleaning process.</p>

--	--	--

4. Utilization of Data Filters  
IN Cognos Dashboard utilization of the filtration to be filtered of all explorations of the dashboard

5. Effective User Story  
No of Scene Added – 15 stories with 2-3 visualizations in each story

6. Dashboard Deployment  
The Dashboard finally get deployed through embedding dashboard with HTML

### Warning Signs of a Heart Attack

**Symptoms**

- Chest pain, chest tightness, chest pressure and chest discomfort (angina)
- Shortness of breath
- Pain, numbness, weakness or coldness in your legs or arms if the blood vessels in those parts of your body are narrowed
- Pain in the neck, jaw, throat, upper abdomen or back

To check whether you are having heart disease or not use the below link

[Click here to visualize in the dashboard](#)>

The dashboard gets view when the user clicks the link
